# Getting started

And where to look

## Boards

**We reccomend using backfire branded boards. They craft quality and high durability boards and have astounding customer service. You can find their store [here](#).**

## Safety Gear

**An extremely popular full face helmet in the scene right now is the TSG pass. It offers full protection for the riders head and keeps us on the roads. As far as padding goes, we reccomend lazy rolling. They feature full kevlar clothing with interchangeable padding built into the fabric.**
